Art Unit: 1754

It is noted that the parentheses in claim 18 are confusing and should be deleted and the claim language suitably rephrased to account for such deletion.

Claim 13 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 8 from which claim 13 depends requires that the copper compound is added during the digestion however claim 13 recites that the copper compound is added prior to the digestion which broadens the scope of claim 8.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6,7,20,23 are rejected under 35 U.S.C. 102(b) as being anticipated by Canada 1179509. See pp. 6,7 and examples 1,4,5. The taught minerals are equivalent to the instantly claimed ore and the taught leaching is functionally equivalent to the instantly claimed digestion.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1754

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,6,7,20,23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Canada 1179509.

CA '509 may differ in that ore and digestion may not be recited and the amounts of copper compound added may only overlap that instantly claimed.

The taught minerals are equivalent to the instantly claimed ore and the taught leaching is functionally equivalent to the instantly claimed digestion.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness, *In re Malagari*, 182 USPQ 549.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
